

How to Make Your Felt Moon

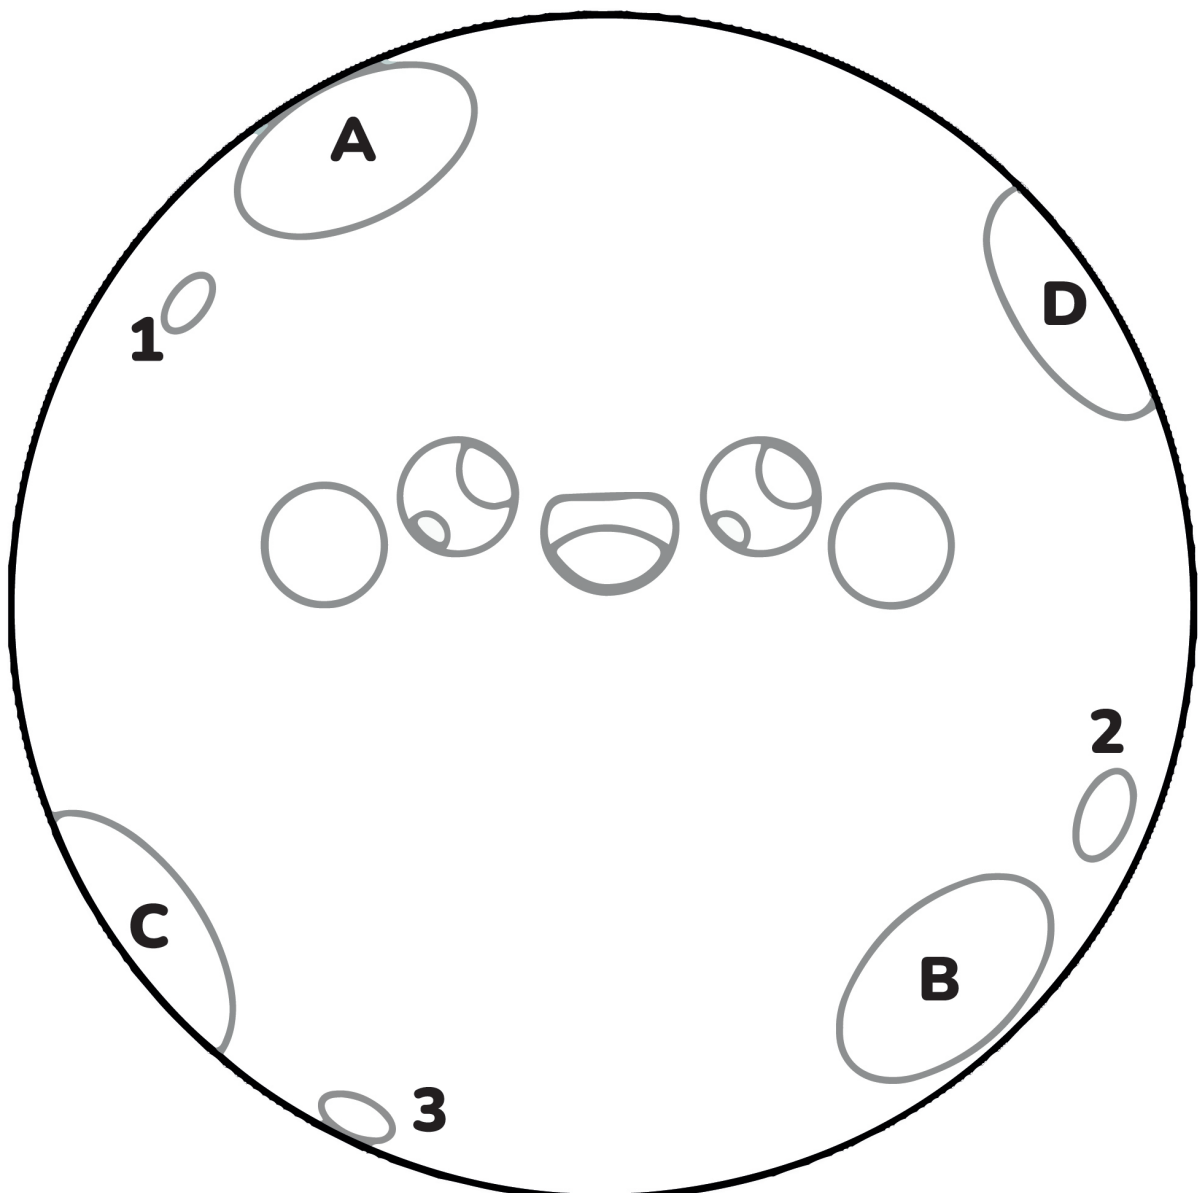

You'll need:

Printed template, felt sheets (purple, dark purple, black, white, pink, orange), scissors, glue, pencil.

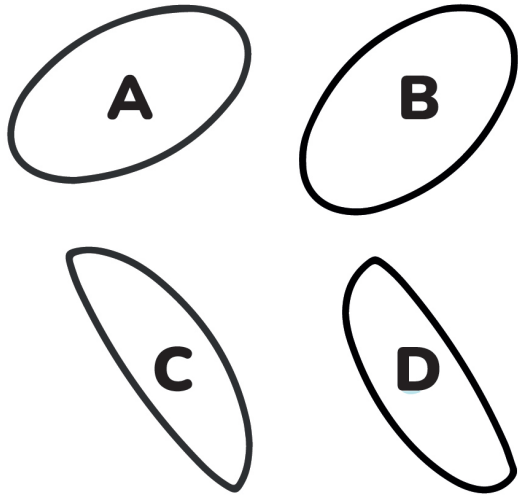

Steps:

- 1. Print & Cut** – Print the template and cut out all the paper pieces.
- 2. Trace** – Place each paper shape on the right color of felt and trace around it.
- 3. Cut Felt** – Cut out all your felt shapes.
- 4. Arrange** – Lay the big circle down, then add craters, eyes, cheeks, and mouth pieces on top.
- 5. Glue** – Glue everything in place, starting with the craters and finishing with the small details.
- 6. Dry & Done!** – Let it dry flat, then show off your cute moon!

Tip: Use fabric glue or Tacky Glue for best results (school glue works too, but may take longer to dry). You can also make it with paper instead of felt!
